Our family cares for yours

Riverview Monuments is part of the Tufts Schildmeyer Family Funeral Home & Cremation Centers "Family of Service". We are family owned and operated. We began in 1997 with a mission to make memorialization affordable and accessible to each family we serve. We believe everyone deserves to memorialize a loved one.

What makes Riverview Monuments unique is that your stone can be hand crafted from the design stage through sandblasting. Our production team can take you through the design process with care and a trained eye for detail. Then, hand craft your stone on site in Loveland, Ohio. This process makes your stone personal and truly a work of art.

We understand how to memorialize your loved one and how difficult it can be just to get started. There are many design options available but what is most important to us is telling YOUR story through YOUR monument. Let us help you take the first step and start designing your memorial today.

So how does Riverview offer such competitive pricing? We follow our mission of providing quality memorials at a fair and affordable price. We believe everyone deserves to memorialize a loved one. We keep our overhead affordable to us so we can pass that savings on to you. We are quarry direct, AMERICAN granite, partnering with other family owned businesses for granite and bronze products. Shipments come directly to us. For more information, make your appointment today!

A Lifetime Of Memories
