## Types of Memorials

1. **Upright Memorials** come in a wide variety of styles, shapes and sizes, providing a full range of creative and personalized works of art.
2. **Slant Memorials** and **Bevel Headstones** are midway in height between flat grave markers and uprights monuments. They come in single or double in size.
3. **Flat Headstones** or **Grass Markers** can be personalized, but the design is naturally restricted by the smaller area. Because they lie flush with the ground, they often are hard to locate in the cemetery.
4. You will also see an occasional statue or **Bench Memorial**.

The fact is, you have a wide range of options available for a lasting tribute to on you loved so dearly whether it be a simple headstone and grave marker to a upright monument. With many design options available, each headstone and memorial can be personalized with special lettering, photos or designs that uniquely personalize the memorial style you can choose.
